

# Ham Polo Ground, Ham

The mobile unit was located on the main road at the entrance to Ham Polo Ground from March to April 1999. The limit values for all three pollutants were not exceeded during this monitoring period. Technical problems with this site have left gaps in the O<sub>3</sub> and SO<sub>2</sub> data.

**Nitrogen Dioxide (NO<sub>2</sub>)**  
Hourly Mean  
Limit=105ppb

**Sulphur Dioxide (SO<sub>2</sub>)**  
15 min mean  
Low up to 100ppb

**Ozone (O<sub>3</sub>)**  
Running 8 Hour Mean  
Low up to 50ppb
