

Get your home ready for winter

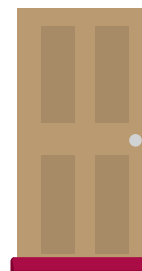

Keep your home warm and free from damp and mould

Heat rooms you spend the most time in to at least 18°C.

Reduce draughts by closing curtains and using draught excluders.

Don't let your home get cold, but do open windows regularly to prevent damp and mould.

Reduce condensation. Wipe down windows, cook with lids on pans and use extractor fans.

Make sure appliances are safe and working well.

(Checked by a Gas Safe registered engineer)

Install a carbon monoxide alarm* and test it regularly.

*certified to BS Kitemark or EN 50291
